Sharing data: understanding our basic data sharing policy

- Submitting your article to a Taylor & Francis, Routledge or Cogent OA journal
- A data set is associated with your paper

The example below shows the steps you'll need to follow for many of our journals with a basic data sharing policy, which encourages authors to deposit data in a suitable repository, to cite it, and provide a data availability statement.

1. Choose the journal you want to submit your paper to
2. Check the data sharing policy in the journal's Instructions for Authors
3. The journal applies the basic data sharing policy
4. Check: has the data been deposited in a repository?
   - Yes
     - A data set is associated with your paper
     - Provide the DOI, reserved DOI, or other persistent identifier when prompted
     - Include a data availability statement with your submission
     - Finalize your submission and when you're ready, submit your paper
   - No
     - Pause your submission and submit the data to a suitable repository
     - Ensure the data has been cited in the paper and reference list
     - Finalize your submission and when you're ready, submit your paper
